Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: All C&CC-owned retail outlets have copies of a hearing aid compatibility information sheet designed to educate customers regarding handset-hearing aid compatibility issues. In addition, copies of the FCC's Consumer Fact Sheet are also available at each retail outlet. Signage in each retail location encourage customers and prospective customers to ask a sales representative about HAC issues. Each customer billing invoice for cellular service contains a flyer encouraging customers to call about Hearing Aid Compatible phones.

C&CC has delivered copies of the company's information sheets to two area audiologists, fourteen area medical clinics, and the area's sole hearing aid retailer. C&CC periodically contacts these establishments to ensure that their stock of handouts is adequate, and to answer questions that may have arisen. This information is also available on C&CC's web site.

Methodology for Functionality Levels

C&CC assigns each compliant handset a level of functionality based upon the company's assessment of two factors: price and operating features. Lower priced handsets with fundamental capabilities are defined as "Basic". More advanced functions or functionality, such as availability of a better quality camera or enhanced memory, together with a higher price, results in classifying a handset as "Intermediate". More expensive phones with the availability of wireless internet capability or an operation system that supports advanced applications are classified as "Advanced".
